

ABOUT

Frustrated by the challenges faced by electricians during cable installations, Manchester-based joiner, Dave Reddy engineered this ingenious solution.

The Gekko Gripper effortlessly navigates floor voids and false walls filled with insulation, simplifying installations. Its key features include efficient cable routing, rapid cord coiling/uncoiling, a wide magnetic surface securing a strong grip, and a reusable tube for storage that easily attaches magnetically to the interior of your van. Plus, you can utilise the magnets as a built-in stud finder.

SPECIFICATION

Product Name	Gekko Gripper
Item Code	SRGG
Cord Length	6 Metres

APPLICATION

Q: What are the most popular applications for the Gekko Gripper?

A: It is a fantastic tool for pulling cables in voids, ceilings for down-lights, across soffits and it's extremely handy for finding joists as it magnetises to the plasterboard screws/nails so you can locate the centres.

Q: How long is the Gekko Gripper?

A: The cord is 6 metres long. This length will take you through the majority of rooms and down most walls.

Q: What happens if the magnets disconnect behind a wall, will I lose the magnet?

A: No, the Gekko is design with the cord attached to just pull the magnet back out of the wall to route again and the other magnet is always in your hand.

Q: Will it work through a double plasterboard and double skimmed wall?

A: Yes, the Gekko will magnetically attract to each other up to a depth of an inch and a half.

Q: Can the Gekko work when there is insulation?

A: Yes, it is usually thin enough to allow you to route between the insulation and plasterboard wall.

Q: Is the Gekko compatible with the other Super Rod accessories?

A: Yes, the Gekko is fully compatible with all Super Rod products and accessories.
