

IP20 DOWNLIGHTS GL8101 GL8102 GL8103

INSTALLATION SHEET

Read these instructions before commencing installation and retain them for future reference.

Important User / Advice

It is recommended that luminaires are installed and fitted by a qualified electrician. Always switch off mains supply before servicing, fitting or changing lamp. Check the lamp is correct for the application, including its voltage and wattage. Ensure that the lamp is correctly located in the lampholder. Ensure that there is adequate free air ventilation around the fitting

Fitting Instructions

Switch off mains supply. Cut out 85mm round hole where fitting is to be installed ensuring that it does not infringe on joist, water pipes or electrical cables. Press in springs at side (1) and insert fitting into hole (2). Insert **GU10** lamp (not supplied) into lampholder (3) and secure with retaining clip (4).

This product comes complete with an LED driver.
