Flexible Links for LED Tape

Packs of 5 flexible links comprising 150mm wire with a snap connector at each end for connecting lengths of LED tape to extend runs or negotiate corners. Snap connectors fit onto connection pads on the tape after paring back any silicone or waterproof coating to make an electrical connection without the need for solder. Where needed, these links can also be cut in half to provide bare wire connection to power supplies with screw terminals. A quick and mess-free solution for in-line connection in LED tape installations.

Tape version 10mm RGB Dimensions (each) 165 x 15 x 5mm
 Cores 4 (blue, red, green, black) IP rating IP20
 Weight (each) 5g Wire length 150mm
