QTFX-900 Fog Machine 900W

Fog machine with wired or wireless remote control. Patented coating inside pipework helps to avoid jams caused by residue build-up and an auto cut-off circuit protects the machine when fluid level is too low. Digital temperature control system maintains a high operating temperature for shorter re-heat times, delivering a high volume of fog output with reliable and efficient flow from a relatively compact and discreet housing.

- High output 900W heating element
- Supplied with wired and RF remote controls
- 10,000 Cu Ft (283m³) per minute (approx.)
- Anti-jamming pipe technology
- Digital temperature control for consistent output
- Illuminated tank to show when ready
- Removable tank for easy maintenance
- Auto cut-off when fluid is too low

Power supply	230Vac, 50Hz (IEC)	Tank capacity	1.3 litres
Power	900W	Remote control frequency	433MHz
Reheat time	4 minutes (approx.)	Dimensions	235 x 180 x 111mm
Fog output (approx.)	10,000 Cu Ft (283m ³) / min	Weight	2.7kg
