

QuietAir

WhisperQUIET

UltraLOW ENERGY

EcoSTART
TECHNOLOGY

A range of elegant, discreet axial fans that are supremely quiet and activate only when they are really needed, using exceptionally low energy

- Extremely quiet, 25 dB(A)*
- Delay start for two minutes avoids unnecessary use (especially at night), and saves energy
- Power consumption only 5 watts *
- Longlife ball-bearing motor with 40,000 hours life
- Two speed options, 75m³/hr* and 90m³/hr
- High efficiency impeller for ducted installation
- Basic switching, timer, humidity and motion sensor versions
- Innovative "Room Refresh" option for programmable ventilation

Quietair combines contemporary design with ultra low noise levels and outstanding energy efficiency.

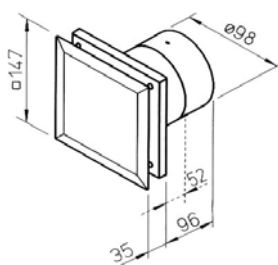

Quietair sets new standards for the reliable, low cost ventilation of toilets, en-suites and bathrooms; and at just 25dB(A) you will hardly hear the fan running, even at night!

Low Energy, High Tech!

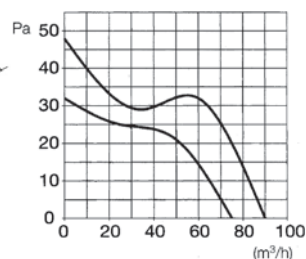

- High efficiency impeller delivers up to 60m³/hr through 12m of rigid ducting, including 90° bends
- Integral flow straightener and back draught flap
- Low specific fan power for SAP assessments
- Clip-on cover for ease of cleaning
- Innovative room refresh option (interval timer) programmable for automatic long term routine ventilation
- Complies with latest Building Regulations Approved Document F
