

## RP Radiant Ceiling Panels

- A sophisticated means of heating commercial premises
- Very safe as personnel have no access to heaters
- High mounting positions allows flexible use of floor and wall space

RP-03 provides an almost invisible source of gentle radiant heat

### Typical Applications

- Offices
- Trade counters
- Care homes
- Meeting rooms

### Features

- Radiant heat without light output
- Specifically designed for quick and easy installation into a suspended ceiling grid
- Fitted with a bracket for easy mounting onto a conventional ceiling
- Attractive white easy-clean finish
- Mounting height up to 4m

### Energy Saving

RP Ceiling Panels are a more economic means of heating commercial premises than conventional heating systems.

- The gentle radiant effect means that the 'experienced temperature' can be up to 4°C warmer than the actual air temperature. This means that the thermostat can be set up to 4°C lower.
- The temperature gradient is negligible. Typically air temperature will increase by 0.3°C per metre above floor level. This figure compares to a typical 2.5°C per metre when using fan heaters.

### Heater Range and Prices

Model	kW	List Price
RP-03	0.3	£150.00
RP-06	0.6	£206.00

### Technical Specification

Model	kW	Volts	Dimensions(mm)			Weight (kg)
			H	W	D	
RP-03	0.3	230	25	595	595	5
RP-06	0.6	230	25	1195	595	10
