

# PW Pipe Freeze Protection Kits

- Prevents water from freezing in metal and plastic pipes
- Avoids the cost and inconvenience of burst water pipes
- Quick and simple to install

## Applications

- Domestic properties
- Commercial premises
- Mobile homes

## Features

- 1.5m power lead and 3-pin plug
- Built-in thermostat (pre-set at 3°C)
- Fully moisture proof
- All cables require 230V supply
- Installed onto pipe and under insulation (20mm max)
- Straight run of cable protects pipes up to 50mm dia.
- Can be wound in an evenly spaced helix (always use the shortest suitable cable)
