This appliance is marked according to the European directive 2002/96/EC on Waste electrical and Electronic Equipment (WEEE). By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.

The symbol  on the product, or on the documents accompanying the product, indicates that this appliance may not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment.

Disposal must be carried out in accordance with local environmental regulations for waste disposal.

For more detailed information about treatment, recovery and recycling of this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

- The packaging materials that Baumatic uses are environmentally friendly and can be recycled.
- Please discard all packaging material with due regard for the environment.

IMPORTANT SAFETY INFORMATION

Your safety is of the utmost importance to Baumatic. Please make sure that you read this instruction booklet **before** attempting to install or use the appliance. If you are unsure of any of the information contained in this booklet, please contact the Baumatic Customer Care Department.

General Information

- This appliance is designed for domestic household use and can be built into a standard kitchen cabinet or housing unit.
- **IMPORTANT:** *The adjacent furniture or housing and all materials used in the installation **must** be able to withstand a minimum temperature of 85°C above the ambient temperature of the room it is located in, whilst in use.*
- Certain types of vinyl or laminate kitchen furniture are particularly prone to heat damage or discolouration at temperatures below the guidelines given above.
- Any damage caused by the appliance being installed in contravention of this temperature limit, or by placing adjacent cabinet materials closer than 4mm to the appliance, **will be the liability of the owner.**
- The use of this appliance for any other purpose or in any other environment without the express agreement of Baumatic Ltd will invalidate any warranty or liability claim.
- Your new appliance is guaranteed against electrical or mechanical defects, subject to certain exclusions that are noted in Baumatic's Conditions Of Guarantee. The foregoing does not affect your statutory rights.
- **Repairs may only be carried out by Baumatic service engineers or their authorised service agents.**

Warning and safety instructions

- This appliance complies with all current European safety legislation. Baumatic does wish to emphasise that this compliance does not remove the fact that the appliance surfaces **will become hot during use and retain heat after operation.**

Child Safety

- Baumatic strongly recommend that babies and young children are prevented from being near to the appliance and not allowed to touch the appliance **at any time**.
- If it is necessary for younger family members to be in the kitchen, please ensure that they are kept under close supervision at all times.

General Safety

- **Do not** place heavy objects on the oven door or lean on the oven door when it is open, as this can cause damage to the oven door hinges.
- **Do not** leave heated oil or fat unattended, as this is a fire risk.
- **Do not** place pans or baking trays directly on the base of the oven cavity, or line it with aluminium foil.
- **Do not** allow electrical fittings or cables to come into contact with areas on the appliance that get hot.
- **Do not** use the appliance to heat the room it is located in or to dry clothing.
- **Do not** install the appliance next to curtains or soft furnishings.
- **Do not** attempt to lift or move cooking appliances by using the oven door or handle, as this may cause damage to the appliance or result in injury to the person lifting the appliance.

Cleaning

- Cleaning of the oven should be carried out on a regular basis.
- Great care should be taken whilst using this appliance and when following the cleaning procedure.
- **IMPORTANT:** *The appliance must be disconnected from the mains before following the cleaning procedure.*

Installation

This appliance must be correctly installed by a suitably qualified person, strictly in accordance with the manufacturer's instructions.

- *Baumatic Ltd declines any responsibility for injury or damage, to person or property, as a result of improper use or installation of this appliance.*
- Heat, steam and moisture will be created during use of the appliance, take care to avoid injury and ensure that the room is adequately ventilated. If the appliance is going to be used for prolonged periods of time, then additional ventilation may be required.
- Please consult with your qualified installer if you are in any doubt about the amount of ventilation that you will require.

Declaration of conformity

This appliance complies with the following European Directives:

- 2006/95/EC regarding "low voltage"
- 2004/108/EC regarding "electromagnetic disturbances"
- Regulation (EC) N° 1935/2004 regarding "materials in contact with food"
- The above directives comply with 93/68/EEC regarding CE marking.
- The manufacturer declares that the oven is built using certified materials and requires the appliance to be installed in accordance with the standards currently in force. This appliance must be used by a trained person for domestic purposes only.

Specifications

Product Dimensions

Height: 590 mm
Width: 595 mm
Depth: 550 mm

Aperture Dimensions

583 mm – 585 mm
560 mm
550 mm (min)

Product specifications

- 4 oven functions
- Energy efficiency class: A
- Oven gross capacity: 59 litres
- Oven net capacity: 50 litres
- Minute minder
- Cooling fan
- Double-glazed removable door
- Removable inner door glass
- Mark resistant coating (BSO612SS only)

Standard accessories

- 2 x Safety shelves
- Enamelled baking tray
- Trivet

Optional extra

- BPS2 Pizza stone

Electrical details

Rated Voltage:	220-240 Vac 50 Hz
Supply Connection:	13A (double pole switched fused outlet with 3mm contact gap)
Max Rated Inputs:	2.35 kW
Mains Supply Lead:	3 x 1.5mm ²
Oven Light Bulb:	25 W/300°C screw type pygmy

Cooling fan

- A tangential cooling fan is fitted inside of this appliance, to make the internal temperature of the oven stable and the external surface temperature lower.
- After you have finished cooking and switched off the oven, the cooling fan will continue to run for a period of time afterwards. The length of time will depend on how long the oven has been switched on for and at how high a temperature.

For future reference please record the following information which can be found on the rating plate and the date of purchase which can be found on your sales invoice. The rating plate for your oven can be located by opening the oven door and looking around the outer edge of the oven chassis.

Model Number

Serial Number

Date of Purchase

Control Panel

- 1) Oven function selector knob
- 2) Minute minder control knob
- 3) Thermostat control knob
- 4) Power indicator light
- 5) Oven operating light

Setting and using the oven

Selecting manual operation mode

Before you can select a cooking function or set a temperature, you must set the appliance into manual operation mode.

- Turn the minute minder control knob **(2)** anti-clockwise, so that it points at the word ON.

Setting the minute minder function

You are able to set the minute minder at any time, regardless of whether an oven function has been selected. You can set a period of time using the minute minder function and an alarm will sound when this period of time has elapsed and the oven will turn off.

- The minute minder can be used independently of an oven cooking function for a time period of up to 120 minutes.
- To set the timer, turn the minute minder control knob clockwise to the required countdown time.
- DO NOT turn the minute minder control knob past the 120 minute marking.
- DO NOT turn the minute minder control knob anti-clockwise past the word ON.
- The time period that has been set will expire when the control knob reaches zero, a brief audible signal will sound and the oven will switch off.

*Before you next use the oven, you **MUST** turn the minute minder control knob anti-clockwise, so that it points at the word ON. Otherwise the main oven will not work.*

Selecting a cooking function and temperature

Before first use

- To remove any residue from the oven that may have been left from the manufacturing process, you should select the fan oven function and set the thermostat to its maximum temperature setting.
- It is perfectly normal for a smell to be produced during this process.
- You should make sure that any windows in the room are left open during this process.
- It is advisable for you not to remain in the room whilst the burning off process is taking place.

- You should leave the oven on maximum setting for 30 – 40 minutes.
- After the oven cavity has cooled, it should then be cleaned with warm soapy water, using either a sponge or soft cloth. No abrasive cleaners should be used.
- Outer parts of the oven should be cleaned with warm soapy water, using either a sponge or soft cloth. No abrasive cleaners should be used.
- We would recommend that an appropriate stainless steel cleaner and polish is regularly used on the stainless steel surfaces of this appliance (***BSO612SS only***).

Selecting an oven function

The oven function selector knob should be used to select the particular mode of cooking that you require. The appliance will utilise different elements within the oven cavity, depending on the oven function that you select. When a function is selected, the power indicator light will come on.

Oven functions

OVEN LIGHT: Separate light control which allows the light to be switched on, even when the oven is not cooking.

DEFROST MODE: The fan runs without heat to reduce the defrosting time of frozen foods. The time required to defrost the food will depend on the room temperature, the quantity and type of food. Always check food packaging for the defrosting instructions.

FAN OVEN: This method of cooking uses the circular element while the heat is distributed by the fan. This results in a faster and more economical cooking process. The fan oven allows food to be cooked simultaneously on different shelves, preventing the transmission of smells and tastes from one dish onto another.

HALF GRILL: This method of cooking utilises the inner part only of the top element, which directs heat downwards onto the food. This function is suitable for grilling small portions of bacon, toast and meat etc.

Thermostat control knob

- The oven thermostat control knob sets the required temperature of the oven. It is possible to regulate the temperature within a range of 50 - 250°C.
- ***Turn the control knob clockwise.***

Oven operating light

- This light will come on to indicate that the oven's heating elements are in operation. The light will turn off when the temperature set on the thermostat control knob has been reached. It will cycle on and off throughout the cooking time.

You should not place food inside the cavity, until the correct cooking temperature has been reached.

Cooking guidelines

- Please refer to the information given on food packaging for guidance on cooking temperatures and times. Once familiar with the performance of your appliance, temperatures and times can be varied to suit personal preference.
- If you are using the fan oven function, then you should follow the information given on the food packaging for this particular mode of cooking.
- You should pre-heat the oven and not place food inside of it until the oven operating light has gone off. You can choose not to pre-heat when using the fan oven mode; however you should extend the cooking time given on the food packaging by at least ten minutes.
- ***IMPORTANT:*** You should ALWAYS pre-heat the oven if you are baking.
- If there is no guidance given on the food packaging specifically for cooking in fan oven mode, you can generally reduce the

cooking time and temperature by 10% from the information given for conventional oven cooking.

- Make sure that frozen foods are thoroughly thawed before cooking, unless the instructions on the food packaging advise that you can “cook from frozen”.
- Before cooking, check that any accessories that are not required are removed from the oven.
- Place cooking trays in the centre of the oven and leave gaps between the trays to allow air to circulate.
- Try to open the door as little as possible to view the dishes.
- The oven light will remain on during cooking.

Warnings

- Keep the oven door closed when using ALL oven functions, including the grill function.
- Do not use aluminium foil to cover the enamelled baking tray or heat items wrapped in aluminium foil under the grill. The high reflectivity of the foil could potentially damage the grill element.
- You should also never line the base of your oven with aluminium foil.
- During cooking, never place pans or cookware directly onto the bottom of your oven. They should always be placed on the shelf provided.
- The grill heating element becomes extremely hot during operation, avoid touching it inadvertently when handling the food which you are grilling.
- ***Important:*** Be careful when opening the door, to avoid contact with hot parts and steam.

Shelf positions

Your oven will come supplied with the following oven furniture:

- (A) Safety shelf (x2)
- (B) Enamelled baking tray

- The numbers 1 – 4, indicate the different shelf positions that you can utilise within the oven.
- You should use the shelf position(s) that you find are best suited to your personal cooking preferences.

Cleaning and maintenance

Cleaning operations must only be carried out when the oven is cool.

The appliance should be disconnected from your mains supply before commencing any cleaning process.

- The oven should be thoroughly cleaned before it is operated for the first time and after each use. This will avoid residual food stuffs becoming baked on the oven cavity. After residues have been baked on several times, they are far more difficult to remove.
- **Never** clean the oven surfaces by steam cleaning.
- The oven cavity should only be cleaned with warm soapy water, using either a sponge or soft cloth. No abrasive cleaners should be used.
- Any stains that may appear on the bottom of the oven will have originated from food splashes or spilt food, these splashes occur during the cooking process. These could possibly be a result of the food being cooked at an excessively high temperature or being placed in cookware that is too small.

- You should make sure that the cooking temperature that is selected is appropriate for the food that you are cooking. You should also ensure that the food is placed in an adequately sized dish and use the enamelled baking tray where appropriate.
- Outer parts of the oven should only be cleaned with warm soapy water, using either a sponge or soft cloth. No abrasive cleaners should be used.
- We would recommend that an appropriate stainless steel cleaner and polish is regularly used on the stainless steel surfaces of this appliance (**BSO612SS only**).
- If you use any form of oven cleaner on your appliance, then you must check with the manufacturer of the cleaner that it is suitable for use on your appliance.
- ***Any damage that is caused to the appliance by a cleaning product will not be fixed by the manufacturer free of charge, even if the appliance is within the guarantee period.***

Replacing the oven bulb

IMPORTANT: The oven must be disconnected from your mains supply before you attempt to either remove or replace the oven bulb.

- Remove the oven shelf and the drip tray.
- Remove the light cover by turning it anti-clockwise.
- Unscrew the bulb clockwise and remove it from its holder.
- Replace the bulb with a 25 W/300°C, screw type pygmy.
- ***Do not*** use any other type of bulb.
- Place the lamp cover back into position.

Removing the oven door for cleaning

To facilitate the cleaning of the inside of the oven and the outer frame of the oven, the door can be removed as follows: -

- The hinges **(A)** have two movable bolts on them **(B)**.
- If you raise both of the movable bolts **(B)**, then the hinges **(A)** are released from the oven housing.
- You should grip the sides of the door at the centre and then incline it slightly towards the oven cavity and then pull the door gently away from the oven cavity.
- **IMPORTANT:** *You should make sure that the door is supported at all times and that you place the door on some padded material whilst cleaning it.*
- The oven door and door glass should only be cleaned using a damp cloth and a small amount of detergent. The cloth **MUST NOT** have come into contact with any form of cleaning product or chemical previously.
- To refit the door you should slide the hinges back into their slots and open the door fully.
- **IMPORTANT:** *The movable bolts **(B)** must be closed back into their original positions before closing the door.*

- **Take care not to dislodge the hinge locking system when removing the door, as the hinge mechanism has a strong spring.**
- **Do not immerse the door in water at any time.**

Removing the inner door glass for cleaning

- Do not use any abrasive cleaner that could cause damage.
- Remember that if the surface of the glass panel becomes scratched, this could lead to a dangerous failure.
- To facilitate cleaning, the inner door glass can be lifted out.

- Grip the top and the bottom of the inner door glass panel.
- Gently pull the **bottom** of the inner door glass panel upwards.

Do not raise the panel more than 35° as it can damage the securing clips.

- The securing clips at the top and bottom of the glass panel will pop out and the glass panel will be free to remove.

If the top securing clips do not pop out when pulling the bottom of the glass panel upwards, then pull the top of the glass panel upwards until the top also pops out.

- After cleaning, insert the glass panel correctly back into the door in the reverse order. Ensure the securing clips slot back into place and the glass panel locks into place securely.

IMPORTANT: Remember where the panel of glass is removed from so you can reassemble the door correctly. Do not mix the glasses up or rearrange the order.

INSTALLATION

The installation must be carried out by a suitably qualified person, in accordance with the current version of the following.

- **UK Regulations and Safety Standards** or their European Norm Replacements.
- **Building Regulations** (issued by the Department of the Environment).
- **Building Standards** (issued by the Scottish Development Department).
- **IEE Wiring Regulations.**
- **Electricity At Work Regulations.**

Electrical connection

Before connecting the appliance, make sure that the supply voltage marked on the rating plate corresponds with your mains supply voltage.

WARNING: THIS APPLIANCE MUST BE EARTHED.

- This appliance should be wired into a 13A double pole switched fused spur outlet, having 3 mm contact separation and placed in an easily accessible position adjacent to the appliance. The spur outlet must still be accessible even when your oven is located in its housing.

- To connect the oven power cord, loosen and remove the cover on the terminal block, in order to gain access to the contacts inside. Make the connection, securing the cord in place with the cable clamp provided and then immediately close the terminal block cover again.
- If you have to change the oven power cord, the earthing (yellow/green) conductor must always be 10 mm longer than the line conductors.
- Care must be taken to ensure that the temperature of the mains supply cable does not exceed 50°C.
- If the mains supply cable is damaged, then it must be replaced by an appropriate replacement which can be obtained from the Spares Department.

Installing the oven into the kitchen cabinet

Positioning the appliance

- Ensure that the aperture that you will be fitting the oven into is of the size given in the above diagram.
- The oven must be fitted into an oven housing with the ventilation cut-outs shown in the "Ventilation requirements" section on the next page.
- Ensure that the rear panel of the furniture housing unit has been removed.

Ventilation requirements

(Figure shows the ventilation and cut-out requirements for the installation of the appliance into a standard kitchen unit).

(Figure shows the ventilation and cut-out requirements for the installation of the appliance into a tall housing unit).

- Ensure that the oven has been securely fixed into the housing unit. The fixing of the oven into the housing is made by using four screws. These should be screwed through the oven cabinet and into the housing unit.

My appliance isn't working correctly

- ***The oven isn't coming on.***
 - * Check that you have selected a cooking function and a cooking temperature.
- ***There appears to be no power to the oven and grill.***
 - * Check that the appliance has been connected to the electrical mains supply correctly.
 - * Check that the mains fuses are in working order.
- ***The grill function works but the main oven does not.***
 - * Check that you have selected the correct cooking function.
- ***The grill and top oven element is not working, or cuts out for long periods of time during use.***
 - * Allow the oven to cool for approximately 2 hours. Once cool, check whether the appliance is again working properly.
- ***My food is not cooking properly***
 - * Ensure that you are selecting the correct temperature and the correct cooking function for the food that you are cooking. It may be appropriate to adjust your cooking temperature by plus or minus 10°C, to achieve the best cooking results.

- ***My food is not cooking evenly***
 - * Check that the oven has been installed correctly and is level.
 - * Check that the correct temperatures and shelf positions are being used.
- ***The oven light is not working***
 - * Refer to page 16 and follow the "Replacing the oven bulb" section.
- ***I am getting condensation in my oven***
 - * Steam and condensation is a natural by product of cooking any food with high water content, such as frozen food, chicken etc.
 - * You may get condensation in the oven cavity and forming between the oven door glasses. This is not necessarily a sign that the oven is not working correctly.
 - * Do not leave food in the oven to cool after it has been cooked and the oven has been switched off.
 - * Use a covered container, where practical, when cooking to reduce the amount of condensation that forms.

IMPORTANT: If your appliance appears not to be operating correctly, then you should disconnect it from your mains supply and then contact the Customer Care Department on telephone number (0118) 933 6911.

DO NOT ATTEMPT TO REPAIR THE APPLIANCE YOURSELF.

Please note that if an engineer is asked to attend whilst the product is under guarantee and finds that the problem is not the result of an appliance fault, then you may be liable for the cost of the call out charge.

The appliance must be accessible for the engineer to perform any necessary repair. If your appliance is installed in such a way that an engineer is concerned that damage will be caused to the appliance or your kitchen, then he will not complete a repair.

This includes situations where appliances have been tiled in, sealed in with sealant, have wooden obstructions placed in front of the appliance, like plinths. Or any installation other than the one specified by Baumatic Ltd has been completed.

Please refer to the conditions of guarantee that appear on the warranty card that you receive with the appliance.

IMPORTANT: Baumatic Ltd operates a policy of continuous improvement and reserves the right to adjust and modify its products without prior notification.

Cooking tables

The cooking tables below for each function should be viewed as a guide only. Other factors can influence cooking results such as food thickness, weight, shape and quality and personal preference.

Fan oven

Food	Weight (kg)	Preheat time (mins)	Shelf position (from bottom)	Temperature (°C)	Cooking time (mins)
Beef	1	15	2	200	40-50
Pork	1	15	2	200	70-80
Chicken	1.2	15	2	200	50-60
Duck	1.5	15	2	200	50-60
Steak	0.8	10	2	180	20-30
Bread	0.5	10	2	200	35-45

Half grill

Food	Weight (kg)	Preheat time (mins)	Shelf position (from bottom)	Temperature (°C)	Cooking time (mins)
Steak	0.8	10	3	250	20-25
Pork	0.8	10	3	250	25-30
Chicken	1.2	10	3	250	40-45
Sausage	0.6	10	4	250	15-20
Hamburger	0.6	10	4	250	15-20
Corn	1.2	10	3	250	20-25
Vegetables	0.5	10	4	250	15-20
