

# QUICK START GUIDE PAGE 2

## TESTING AND OUTDOOR SENSOR INSTALLATION

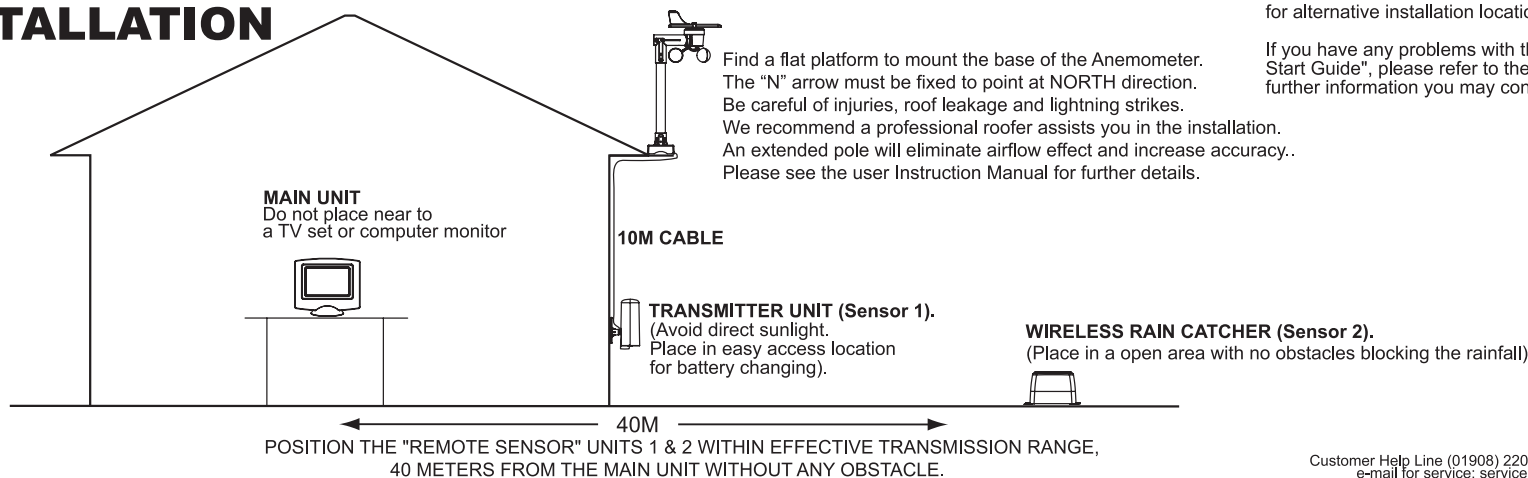

Please follow the Instructions below carefully & test the sensors before installing outdoors.

<p><b>1. INSTALL 3 "AA" BATTERIES INTO MAIN UNIT.</b></p>	<p><b>2. PUSH A PIN INTO THE RESET HOLE TO SIMULTANEOUSLY RESET ALL ELECTRONIC CIRCUITS IN THE MAIN UNIT.</b></p>	<p><b>THE CLOCK SEARCHES FOR THE TIME SIGNAL FOR 10 MINUTES, ALL THREE ANTENNAE ICONS START TO FLASH.</b></p>	<p><b>3. CONNECT THE ANEMOMETER TO THE OUTDOOR SENSOR BATTERY BOX</b></p>	<p><b>4. INSTALL 2 BATTERIES INTO THE OUTDOOR SENSOR 1 - BATTERY BOX</b></p>
	 <p>RESET HOLE</p> <p>Three consecutive beeps plus one single beep</p>	 <p>CLOCK SEARCHING FOR TIME SIGNAL</p> <p>Signal received semi circular signal icon</p> <p>Signal not found no semi circular signal icon</p>		 <p>Insert</p>

<p><b>THE ANTENNAE ICON UNDER OUTDOOR TEMPERATURE WILL FLASH FOR 5 MINUTES, SEARCHING FOR THE OUTDOOR TEMPERATURE AND WIND READING FROM SENSOR 1</b></p>	<p><b>5. INSTALL 2 BATTERIES INTO THE RAIN CATCHER (SENSOR 2)</b></p>	<p><b>THE ANTENNAE ICON UNDER RAINFALL COUNTER WILL FLASH FOR 5 MINUTES. WHEN THE SIGNAL IS RECEIVED THE ICON WILL STOP FLASHING</b></p>
 <p>WHEN THE SIGNAL IS RECEIVED THE OUTDOOR TEMPERATURE WILL SHOW A READING.</p> <p><b>PLEASE NOTE:</b> THERE IS NO WIND READING AS THE ANEMOMETER IS NOT RUNNING.</p> <p>THE OUTDOOR HUMIDITY REQUIRES ADDITIONAL SENSOR (CH2), WHICH IS NOT INCLUDED.</p>		

**AFTER TESTING PLEASE PROCEED WITH OUTDOOR SENSOR INSTALLATION.**

## OUTDOOR SENSOR INSTALLATION

**IMPORTANT NOTE:** To ensure accurate readings from the Weatherstation and for alternative installation locations please read the USERS INSTRUCTION MANUAL.

If you have any problems with the set-up or do not understand any part of the "Quick Start Guide", please refer to the users Instruction Manual first. Should you then require further information you may contact our Customer helpline at the bottom of the page.
