## Drive Over Cable Covers

Extensively tested with vehicular traffic, these easy-to-use robust Drive Over Cable Covers, produced in UK, offer reliability and an extended longevity of use.

Drive Over Cable Covers are ideal for outdoor events, exhibitions, site-electrics, industrial plants and factory floors.

All lengths can be simply joined by interlocking male:female connectors to provide longer runs. Multi-cavity versions

have a handle on reverse-side for easy carrying. All have angled sides with anti-slip treads, suitable for pedestrian traffic and trolleys and wheelchairs also. Note the ramps have low-profile height dimensions.

Lengths are UV stabilised, for use between -40°C and +50°C, so are perfect for indoor or outdoor applications. According to capacity required and type of traffic, choose from a single channel, a 3 channel Heavy Duty version, and 3 or 5 channel Extra Heavy Duty options.

D-Line Ref	Description	Axle Weight (kg)	Colour	No of Channels	Channel Size W x H (mm)	Weight (kg)
DO-1B765	Single Channel Cable Cover 765mm (L) x 133mm (W) x 22mm (H)	N/A	Black	1	38x12	1.1
DO-3BR920	Heavy Duty 3 Channel Cable Cover 920mm (L) x 460mm (W) x 35mm (H)	4,760	Black Lid/ Red Base	3	(3x) 64x18	9.1
DX-5RB910	Extra Heavy Duty 5 Channel Cable Cover 910mm (L) x 505mm (W) x 45mm (H)	9,140	Red Lid/ Black Base	5	(4x) 34x30 (1x) 41x30	11.4
DX-3RB910	Extra Heavy Duty 3 Channel Cable Cover 910mm (L) x 473mm (W) x 75mm (H)	9,140	Red Lid/ Black Base	3	(3x) 53x52	16.6

- Single channel option simply lays over cables. Ideal for flexes and arctic-grade cables up to 12mm diameter
- All 3 and 5 channel versions have solid bases with compartmentalised channels, and toughened-hinged lids. Suitable for armoured cables, hoses and pipes.
- Carrying handle on reverse side
- Produced in UK
- Extensively tested to ensure fit-for-purpose & peace-of-mind. Extremely durable
- Longevity of use enables exceptional value from extended usage
