

Low Surface Temperature Heater

An NHS 'Low Surface Temperature' Guideline compliant heater with advanced performance and controls

Benefits

Reduced running costs thanks to the highly accurate control and clever energy saving features.

Safe surface temperatures ideal for schools, hospitals, public areas and other sensitive environments.

The controls are simple to use and deliver heat exactly when it's wanted.

Quick and easy to install.

Key Features

Intelligent control system, pre-programmed for immediate use.

The ultra-quiet fan and highly accurate electronic thermostatic technology precisely controls the temperature and warms the room quickly.

No external surface of the product will exceed 43°C for maximum safety.

Open window sensing technology to reduce wasted heat.

EcoStart function to cut warm-up costs.

Range of three sizes from 750W to 1.5kW.
