

Central control

Central control

Dimplex RF controllers and receivers provide energy saving control to deliver the greatest possible levels of energy efficiency, versatility and ease of use. By utilising radio waves to transmit their signal, radio frequency controls remove the need to wire controls to their receivers – meaning quick, easy and trouble-free installation. As such, this system is ideal for use in both new build and existing installations, and is perfect for controlling towel rails.

RFBT

- Radio frequency wall-mounted rotary controller
- Comes complete with RF receiver which must be wired to the relevant appliance
- Offers RF thermostatic control
- 30 minute boost button
- Wall-mounted controller unit fits into single gang wiring accessory back box
- IPX4 rated (splash-proof) for use in wet areas
- Can control any heater up to a loading of 2kW
- Ideal for providing extra control to towel rails
- Multiple receivers can be controlled by a single controller
- Additional receivers sold separately (RFREC)

RF24T

- Radio frequency wall-mounted LCD programmer
- Comes complete with RF receiver which must be wired to the relevant appliance
- Offers 24hour programming
- 4 programmable time periods, switching heater between On/Off modes
- Programme advance and manual override features
- 30 minute boost button
- Thermostatically controlled
- Back lit LCD screen with power save mode
- IPX4 rated (splash-proof) for use in wet areas
- Can control any heater up to a loading of 2kW
- Ideal for providing extra control to towel rails

- Programmes saved in memory for 12 hours in the event of a power failure
- Multiple receivers can be controlled by a single controller
- Additional receivers sold separately (RFREC)

RF07T

- Radio frequency wall-mounted LCD programmer
- Comes complete with RF receiver which must be wired to the relevant appliance
- Offers 7 day programming
- 4 programmable time periods for weekdays and weekends, switching heater between On/Off modes
- 30 minute boost button
- Thermostatically controlled
- Back lit LCD screen with power save mode
- IPX4 rated (splash-proof) for use in wet areas
- Can control any heater up to a loading of 2kW
- Ideal for providing extra control to towel rails
- Programmes saved in memory for 12 hours in the event of a power failure
- Multiple receivers can be controlled by a single controller
- Additional receivers sold separately (RFREC)

RFREC

- Additional receiver for use with RF controller/programmer (RFBT, RF24T, RF07T)
- Allows an additional heater up to 2kW loading to be controlled simultaneously by RF controller/programmer
