Installation

Site the door station a recommended 1.5 meters from the ground, or to suit application.

The camera needs to point in the direction of where a visitor will stand during operation.

Avoid areas of high sunlight and noise levels.

Surface mount the sunshield of the door station and connect the system cabling. Mount the camera to the sunshield by fixing with the supplied hex screw.

Site the indoor monitor to suit application.

Surface mount the bracket of the monitor or if required onto a 1-gang mount box (not supplied). Make the system connections to the back of the monitor and then slide the monitor onto the bracket using the hooks to hold firmly in place.
System Connections Example 1

- Set dipswitch 6 to ON
- All other switches set to OFF

Ensure the Address ID switches are both set to OFF

Total cable run should not exceed 150 meters between door station and monitor
Power supply to be within 100 meters of monitor
No cable or connection polarity
System Connections Example 2

The system power supply can support up to 5 devices

1. Only one monitor is set as the MASTER:
   - MASTER = ON
   - 6 7 OFF

2. All other monitors set as SLAVE:
   - SLAVE = ON
   - 6 7 OFF

3. Refer to instructions supplied when using different version of monitor for MASTER/SLAVE configuration

When using multiple door stations ensure that each unit has a separate Address ID

The dipswitches are accessible on the rear of the door station
Lock Connections Example 1

Electro-magnetic lock  
Electronic lock

Timer 0~20S
NC
+ -
NC for Electro-magnetic lock
N.O for Electronic lock

System Wiring

At the rear of the door station ensure that the jumper links cover pins as per below
Lock Connections Example 2

- The jumpers on the rear of the door station offer different types of release modes for alternative applications dependent on the jumper link settings. LOCK1 options;

- The door station has a secondary switch. LOCK2 options;

- Jumper 1 gives the option to set the release time;

- Please refer to the operation guide for release instructions.
User Guide

Talking Volume: Adjust the volume level of the monitor
Installer’s Guide

Master / Slave Setting

When using multiple monitors on 1 system; Only the 1 handset set as the MASTER will display an image when the door station is activated. All other monitors will ring, and will display the image once the ‘Talk’ button is pressed.

In the event of no video or audio signals coming from the monitor, or if the call button or audio cannot be activated on the door station, check the following:

A  That the system is powered sufficiently.
B  Each monitor needs to be set to a MASTER or SLAVE position
C  All system cabling is secured and properly connected.
D  All system cabling is clear of breaks or short circuits.
E  Bench test the system if the issue cannot be found.

In the event of a lock release issue, check the following:

A  The user instructions and operation of the monitor has been understood.
B  That the lock is powered sufficiently.
C  All system cabling is secured and properly connected.
D  All system cabling is clear of breaks or short circuits.
E  On the rear of the door station, ensure the lock output is switching when activated by the monitor.
