

INF-PANIC

The INF-PANIC is a one-button hand-held transmitter designed for use with the infinite alarm system. This water-resistant transmitter is designed for panic-button applications and can be worn around the neck. Its large button makes it ideal for the elderly, disabled or sight-impaired users.

Registration

1. Set the receiver to Registration mode.
2. Press the button, making sure that the LED lights up when the button is pressed.
3. Wait for five seconds and press the button again.

Alternatively, the INF-PANIC can be registered to the receiver by manually entering the transmitter's serial number.

Low Battery Indication

The INF-PANIC indicates a low battery condition using one of the following two methods:

- The LED indicator flashes during transmission.
- A Low Battery signal is sent to the receiver.

On receiving either of these indications, replace the unit.

Technical Specifications

Antenna: Built-in whip

Frequency: 433.92MHz, 418MHz or 868.35MHz FM

RFI Immunity: 40V/m

Operating Temperature: 0 - 60°C

Dimensions: 60 x 40 x 15mm
