No Wires, No Fuss, No Mess!

Control numerous electrical devices with one Easy Switch
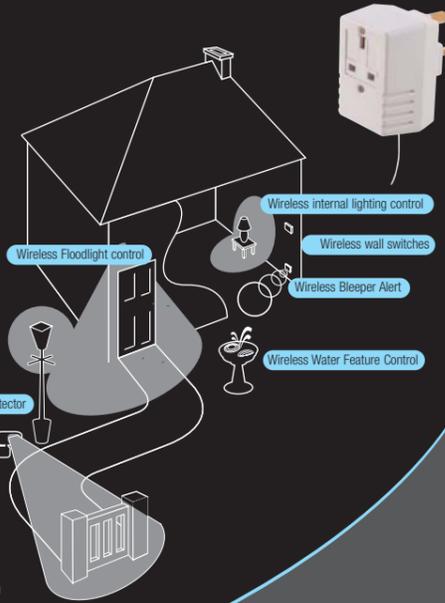

No more running cables all over your house and garden

No more additional wall switches, trunking, chasing out brickwork

No more hassles!

Wireless internal lighting control

Wireless wall switches

Wireless Floodlight control

Wireless Bleeper Alert

Wireless Water Feature Control

Wireless PIR Detector

1 simple solution that takes control of all supplimentary devices such as lighting, garden equipment, water features, security gates and more... The list is endless.

An EasySwitch remote control unit which can control from 1 - 4 devices makes running your home child's play. Plus with the addition of an EasySwitch PIR, security lighting and other measures can be fully automated, leaving you with total peace of mind.

Put the power of remote home automation at your fingertips with an EasySwitch.

Easy Switch Wireless Controlled
Lighting And Alert System

Easy Switch is a highly developed, versatile wireless switching system that uses FM radio waves to operate. It can be used internal and externally and will switch resistive loads up to 1KW over a range from 100 to 200 metres. Through walls, buildings and trees the range will be reduced. No licence required.

### Easy Switch Key Fob Transmitter

Description

1 or 4 switch key fob. Can operate the ESR1, ESR2, ESR4, ESA1 and ESB1 receivers. They may be used individually or in conjunction with EST1 transmitters and ESD detectors. Up to 100 metre transmission range.

Code
ESF4	Four way key fob
ESF1	One way key fob

Easy Switch Wall Transmitter

Code
EST1

Description

Mounts inside a 25mm. Deep standard, recessed or surface switch box and is compatible with most switch plates up to 3 gang. Does not require any cabling. Uses 3 x AAA alkaline batteries (Not supplied). Can operate the ESR1, ESR2, ESR4, ESA1 and ESB1 receivers. They may be used individually or in conjunction with ESF1,4 key fob transmitters and ESD detectors. Up to 100 metre transmission range.

Easy Switch Transmitter PIR Detector

This battery operated external PIR detector can remotely operate lighting and audible warning when used with the appropriate receiver. ESR1, ESR2, ESR4, ESA1 and ESB1. Day and night modes, up to 200 metres transmission range, adjustable timer (5 sec to 10 min) Uses 9v. PP3 battery (Not supplied). Waterproof to IP66.

Code
ESD1	15m x 90 degree, Standard
ESD2	40m x 1 degree
ESD3	12m x 90 degree, Curtain

Easy Switch Mains Operated Plug in Bleeper

Gives an audible bleep each time it receives a valid signal from an ESD1 PIR detector or ESF1 & 4 key fob. Simply plugs in to a mains socket. 5 second bleep time.

Code
ESB1

Easy Switch Mains Operated Plug in Adapter

Simple operation, just plug into a standard 13 amp socket to provide wireless remote switching up to 1000w resistive. Operates from EST1, ESF1&4 and ESD1, 2&3. Ideal for operating table lamps and other plug-in appliances

Code
ESA1

Easy Switch Mains Operated Receiver

The on/off receiver with 1KW resistive switch capacity can operate a variety of devices such as garden lighting, pond pumps, electric gates and more with it's volt free change over contacts. Operates from ESF1 & 4, EST1 for ON/OFF operation. The ESD1,2 & 3 PIR detectors provide timed operation. Three sectable modes. Single, two way and mimic. Can learn up to 16 devices. Waterproof to IP66.

The easy switch receiver is also available as a 12v version, with similar features as ESR1, except that it is powered by a 12v. DC Supply (not supplied). Volt free contacts. Waterproof to IP66.

Code
ESR1	Mains Version
ESR2	12v Version

Easy Switch 4 Channel Receiver

Supplied in external weather proof enclosure, IP66. 220-230v. supply, 4 independent 16 amp relays providing 4 x 1KW. switched outputs. Independent mode selection for each channel (Single / Two Way & Mimic). Compatible with all Easyswitch products. Waterproof to IP66.

Also Availible as a kit, with 1 x 4 button key fob included.

Code
ESR4	4 Channel Receiver
ESR4X4	4 Channel Receiver Kit
