SH12A	1.70kW/12kWh	H.730mm x W.540mm x D.150mm	8	19	79
SH18A	2.55kW/18kWh	H.730mm x W.765mm x D.150mm	12	26	116
SH24A	3.40kW/24kWh	H.730mm x W.990mm x D.150mm	16	32	152

Elnur Mathius storage heaters are ideal for living & dining rooms, hallways and landings. The range can also be used in bathrooms outside zone 2, provided the installation complies with IEE regulations.

Storage heaters offer comfortable warmth throughout the day taking advantage of low-tariff electricity. Manual models charge throughout the low-tariff period where as automatic models incorporate an ambient thermostat which optimises the charge to suit room conditions. Typically the automatic models can save an additional 15% in energy costs.

The controls are conveniently positioned on top of the storage heater for ease of use. Once the optimum settings are selected, no further adjustment is necessary.
