

## CHANGING THE WAY YOU THINK ABOUT COMMERCIAL INSECT CONTROL

For many years the sales of commercial insect killers have concentrated on cheap, dirty zappers that are not effective and is now proven to spread disease. The NoFLi glue board system is safe, silent, odourless and discreet as well as being a cost-effective offering made from quality components in the UK.

### No-FLi offers much more comprehensive benefits for food service professionals including:

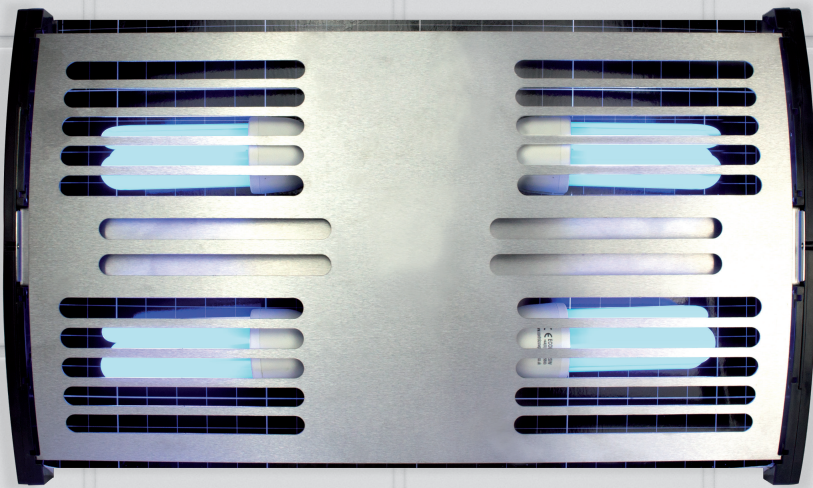

- ✓ Increased catch rate by using both reflective and direct UV power
- ✓ Catches flies Whole rather than the insect particles exploding bacteria into the surrounding area
- ✓ 5 second service and clean – no tools needed and safe for anyone to maintain without training or technical experience
- ✓ Quality British design and manufactured in Yorkshire with a 3-year guarantee
- ✓ Professional branding – An own brand laser cut option into the stainless steel front
- ✓ Aesthetically pleasing design to ensure there are no unsightly flies for customers to see, no burning and no smell – Looks good in any kitchen or dining area
- ✓ 4 ways to position – wall mounted, ceiling suspended, free standing vertical, free standing flat
- ✓ A choice of colours – Stainless as standard or choose from white, black or Red
- ✓ Competitive price and used in commercial, domestic or industrial settings

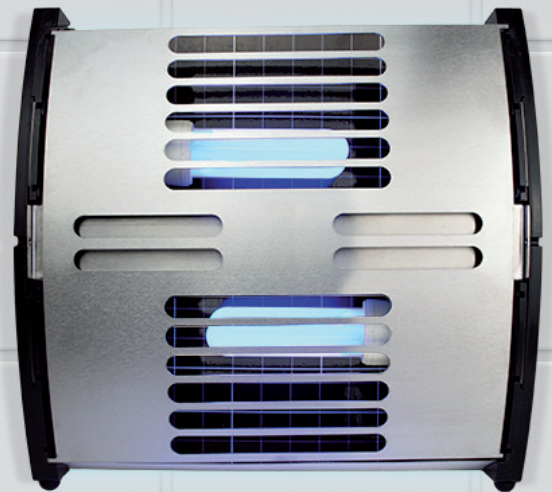

## NO-FLI IS SAFER, MORE EFFECTIVE AND MORE HYGIENIC THAN ANY OTHER FLY CONTROL OPTION. 2 MODELS ARE AVAILABLE:
