

AC Switch Disconnecter

From heat pumps and air conditioning units to compressors, motors, three-phase inverters and industrial machinery, our compact AC Switch Disconnecter suits a wide range of three-phase applications.

- 20A, 32A, 40A, 50A, 63A, 80A and 100A options to suit a wide range of three-phase applications.
- Disconnects L1, L2, L3 and Neutral, preventing neutral feedback.
- Compact design for applications where space is at a premium.
- Early-break neutral design for safer switching during isolation.
- Padlockable for secure circuit isolation during maintenance.
- Manually operated red/yellow interlocked handle for secure ON/OFF isolation.
- Signature spacious internal layout for easier cable termination.
- Top and bottom cable entry drill-outs for flexible cable routing (M20/M25).
- Internal switch assembly can be removed for easier access if required.
