3561	LED Pond Light 3 Lamp Set	50 10646 04346 5	2

LED lights are becoming increasingly fashionable in home and garden design. LED (light emitting diode) lights emit a very powerful distinctive clear and direct light to illuminate the pond or fountain. Hozelock Cyprio's new LED lights are based on the successful design of our current Aqua-Glow lights so they can either sink to the bottom of the pond, float on the surface or attach to the Cascade fountain pump to light up a fountain.

Each pond light includes 10 LEDs for maximum light output. The three lamp LED light set works off a 12-volt supply for easy DIY installation and uses a mere 2.85 watts, which means the running cost is extremely low.

The lights are supplied with a range of coloured lenses.

### 1 Authentic granite sphere pebble water feature

The sight and sound of water trickling over natural pink granite is very relaxing. The granite sphere has been hollowed out to reduce its weight to simplify installation. A specifically designed plastic insert evenly distributes water over the sphere and comes with hose (Ø12mm) attached to it. This hose simply push fits over the pump's outlet. Includes a Cascade 700LV pump.

### 2 Low voltage glowing sphere water feature

During the day, the sphere resembles attractive pink granite while at night a single pond light (inside the sphere) makes it glow in the dark. Includes a Cascade 700LV pump, single pond light, 60VA transformer and 7.5m of LV cable.

### 3 Patio pebble water feature with authentic wooden surround

An attractive varnished natural wooden surround compliments the patio and garden furniture. The complete water feature is pre-assembled so installation couldn't be easier – you don't even need to dig a hole. Includes a Cascade 700LV pump.

## Complete easy to install attractive water feature kits for the patio and garden

A range of three attractive pebble water feature kits, which can be installed in an afternoon and simplify consumer product selection and in-store merchandising.
