Kidde Fyrnetics

Control for Smoke and Heat Alarms

Test   Hush/Locate

Test   Press once - Alarms will sound for 10 seconds.
              Press for 3 seconds - Alarms will stay on.
              Press again - Resets alarms.

Hush/Locate   Press once - Alarms not sensing smoke or heat
                  will silence and then auto reset in 8 or 15 minutes.
                  Press again - Manual reset.

Remote Test, Hush & Locate switch REMTH

For fixing to recessed or surface single gang box

Purpose:

Designed to enable remote functionality of connected hard wired
Kidde smoke, heat & CO alarms, as below:
- CO- 423/9hi & 423/9hir
- Slick® Fast Fit- 1SFW/1SFWR, 2SFW/2SFWR, 3SFW/3SFWR

  o Kidde Firex- 4870/4881, 4973/4985, 4899/4892

Function and Compatibility:

This is a mains powered (230 vac) device for use with Kidde hard wired smoke,
heat & CO alarms as listed above. *A Wireless "RTH" switch is available for use with Slick® alarms.*

It is designed to control a single unit or an interlinked group of alarms and
may be connected at any part of the supply circuit where the interlink line is present.
It can be retrofitted into existing installations already equipped with Kidde alarms.

- **Test** all interconnected Alarms
- **Hush** unwanted alarms
- **Locate** the initiating alarm in event of activation
- **Manually trigger interconnected alarms**

Applications:

1 Suitable for any householder who would have difficulty reaching
   an alarm's Test or Hush buttons easily
2 Can be retrofitted where occupancy type changes

Features:

The 2 push button switches enable you to remotely test and control Kidde smoke,
heat & CO hard wired alarms.
The buttons are marked Test and Hush; T and H are embossed in Brail on each button.
The LED displays red or green dependent on status:
- Mains Healthy - Green
- Test Status - Flashing red
Hush\ Locate status - Steady red

CE

Fixings:

2 machine screws (M3.5) supplied for standard single gang socket or dry lining box.

Test Button

Pressing Test Button once - all alarms will operate for 10 seconds -
LED changes from Green to Flashing red.
After 10 seconds it resets back to Green

To Test connected Smoke and Heat Alarms for 10 seconds +

Press Test Button for 3 seconds - all sounders will operate continuously
for longer than 10 seconds.
LED changes from Green to flashing red.
Press Test button again to silence and reset alarms - *LED reverts to Green*

Hush\ Locate Button

This enables you to locate the initiating alarm when event occurs, and to silence unwanted alarms.
Duration of hush is preset to either 8 or 15 minutes duration by the installer and can be manually over ridden by the user.

Installation:

This is for installation by a qualified electrician.
Comprehensive installer & user instructions [also available as pdf from web site]
included. *Please digest before commencing installation process.*
Up to 24 interconnected smoke & heat alarms can be connected or 18 smoke, heat & CO alarms.

Electrical Rating/Operating Range:

230V AC
4.5 deg C to 37.8.
R Humidity up to 85%

Dimensions:

85mm square x 35
Depth dependent too on mounting type; using surface mount box would add 25 or 32mm depth
Packed in cartons; outers of 6
