

GRIPPER 300 Registered model

It can be placed on or grip any surface and can be magnetized. The GRIPPER 300 provides you with lighting in any situation. Shock-resistant, swivelling and capable of operating for more than 100 hours, the GRIPPER 300 is the ideal lamp for demanding professionals and amateurs alike.

LAGO
THE SOLID LIGHT

TECHNICAL FEATURES

Lighting source :

3 LED 5mm, long life (do not need replacing).
Lighting surface area : 40m² (new batteries).

Energy source :

3 x LR03 (AAA), 3 alkaline batteries supplied (4,5V).
Operating duration : up to 150 hours (see diagram).

Use :

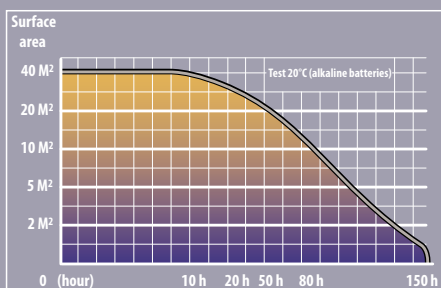

Can grip on any surface up to 36 mm in thickness.
Can be magnetized to any steel element (néodyme magnet).
Can be placed on any flat surface (protective pads).
Rotating light beam (180°).
Temperature of use : -25°C...+50°C.

Safety / Protection :

Non-scratch, non-slip, two-material jaws.
Weather-resistant (rain, snow...)
Electronically protected LEDs (if polarity is inverted).
Self-cleaning contacts.
Simple and fast battery changing.
Guarantee : 3 years (see general sales conditions)

Materials (shock-resistance concept) :

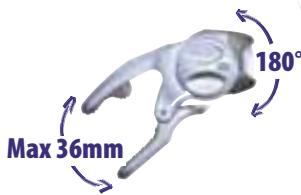

Body made of reinforced Polyamide, front protection and jaws made of Polyuréthane, glass of polycarbonate.

LED technology high performance

LEDs produce a homogeneous and panoramic light. Being very resistant, they have a service life of several years' constant use.
