ESB.1

Mains Operated Plug-In Bleeper

This useful bleeper gives an audible sound each time it receives a valid signal from an EasySwitch PIR detector or key fob. For example, EasySwitch PIR detectors installed on a driveway could alert the resident to a person or vehicle entering the detection area. It will sound a 5 second bleep which can be selected to sound day only, night only or all the time.

Designed for indoor use only, the ESB1 is powered from the mains socket into which it is plugged. Up to 16 detectors or key fobs can be learned to one ESB1.

Technical Specifications

	ESB.1
Power	Mains operated 220-240V 50Hz
Wireless Transmission	433.92Mhz
Transmission Range	200 metres
Enclosure	ABS Plastic
Standards	BS EN 60669
Weight	100 grams
Dimensions	75 x 50 x 75mm
