

17th Edition MK Sentry Solutions

January 2008 saw the introduction of BS7671: 2008, the 17th Edition IEE Wiring Regulations, which will come into full effect from 1st July 2008. The biggest change from the 16th to the 17th Edition is the increased use of RCDs. Specific consumer unit configurations have been designed to provide flexible solutions in meeting the requirements of the 17th Edition with regards to RCD protection for circuits, cables and socket outlets. The new MK Sentry Consumer Units, available in insulated and metal versions, allow for protected and unprotected ways with the circuits being split across up to 3 RCDs, whilst a new labelling sheet allows for full identification of all circuits.

Split load board with RCBOs

MK recommend the use of a split load board with RCBOs. An RCBO will provide individual over current and earth leakage protection for an outgoing circuit. In the event of fault conditions the supply will be disconnected only to the dedicated circuit. Standard configurations augmented with RCBOs provide the optimum solution for additions and alterations.

Insulated Board

DESCRIPTION

10 WAY 100A SWITCH,
2 X 63A 30mA RCD

K5566S MAG 17ED

Metal Board

K5686S MAG 17ED

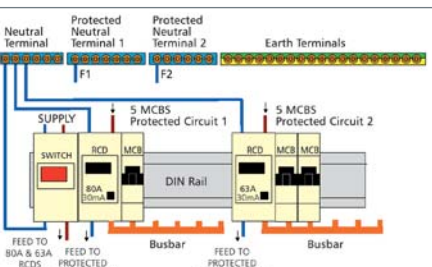

Insulated Board

DESCRIPTION

10 WAY 100A SWITCH,
80A 30mA RCD and
63A 30mA RCD

K5586S MAG 17ED

Metal Board

K5681S MAG 17ED

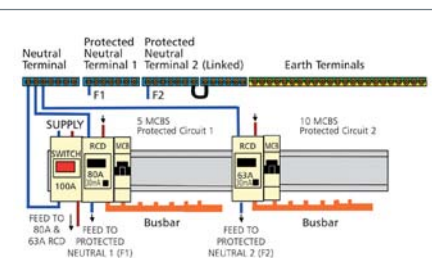

Insulated Board

DESCRIPTION

15 WAY 100A SWITCH,
80A 30mA RCD and
63A 30mA RCD
