## Twist<sup>®</sup>

PORTABLE BLUETOOTH SPEAKER

This revolutionary wireless speaker aptly labeled by I-Box as the Twist is one of the most compact, indulgent wireless sound experiences available in the consumer electronics market today.

### ***SET THE SCENE***

Picture a device you can truly regard as being portable; small enough to fit in your bag or glove box. So unobtrusive in its dimensions that it can comfortably balance on the palm of your hand. Having taken a moment to appreciate its diminutive size, you decide to pair it with your media device of choice (any Bluetooth enabled device is needed to utilize the full wireless functionality), let your finger sink onto the power button and through the wonders of sound reproduction be sonically transported right to the heart of the gig, concert or even rave depending on your musical disposition. You feel like you are actually right next to the decks, hear the plectrum being stroked against the Steel and recreate those low end chest disturbing tremors in a way that will have you questioning the laws of physics in the comfort of your own space. How can a compact black & orange box pack quite so much punch?

## ***WALK QUIETLY & CARRY A BIG SOUND***

The TWIST belies belief; the science behind this sonic secret is the harmonious marriage of two full range acoustic speaker drivers to a single passive low end frequency radiator. This spectacular array of speaker technology results in a device that is able to reproduce all the squeaks, mid-range clout and bass booms to enhance your listening experience. This will surely bring a grin wider than that first seen on a Cheshire cat to even the most die-hard audiophile fans at a sum that is astonishingly accessible.

## ***STYLE WITH SUBSTANCE***

The TWIST sounds superb but it is by no means a victim of its own sonic success. Its design elements echo the impression that there is far more to this device than its deceptively accessible purchase price. The helical contours which define the device's shape make you aware that this device is something special right from the onset. Its' inviting, premium touch-kind finish not only looks the part and it also manages to give the device an effortless air of quality when held in the hand, never before seen at this price point. The cluster of buttons reacts to your commands, lighting up instantly according to the state of the device. Each button has a definite quality which is apparent from the first touch, whether you're resuming your track or answering a call, you can really sense the quality; cascading from every design contour and oozing from each pore in the speaker grill.

### ***TWIST AND TALK***

With the TWIST you are absolutely free to engage in crystal clear hands-free communication using the built-in advanced noise cancellation microphone. No matter where you are the TWIST can be your trusted calling companion. The TWIST will make sure that you are heard as well as seen.

### ***TWIST EVERYTHING***

Treat all your sounds to the TWIST experience. Whether you opt to play sounds from your laptop or smartphone, tablet or desktop as long as the device supports Bluetooth you can enhance your sound with the TWIST Bluetooth wireless speaker. A realistic playtime of up to 5 hours using the onboard lithium rechargeable battery makes portable hi-fi a reality once only confined to the realms of fantasy. The experience doesn't end with the product; log onto [www.iboxstyle.com](http://www.iboxstyle.com) and join the I-Box Community to gain exclusive offers and get yourself involved in something special!
