

At the flick of a switch these new distribution units will now function fully with systems that don't include a satellite receiver. As well as those that do.

HDU641S
4-way Home Distribution Unit

HDU681S
8-way Home Distribution Unit

This new series of Home Distribution Units is now designed to distribute any combination of SKY™, SKY+™, FM, DAB, UHF and CCTV signals around the home.

Each version has the capability to combine satellite, FM, DAB, UHF and CCTV on to a single drop cable, with the addition of the facility for SKY+™.

The return feed from the living room then distributes the RF channels around the house via the Uplink connection on the Home Distribution Units.

Each Secondary point in the house or apartment can receive any combination of 5 off air channels, FM, DAB, CCTV and the RF 2 output from the Sky™ box with the facility to control it using an infra red remote eye.

Features Include:

- 12v 45mA line powering for Masthead.
- Separate inputs for FM, DAB, UHF, CCTV, LNB1 and LNB2.
- Excellent filtering with a Flat UHF response.
- Minimal insertion loss.
- 9v 15mA with short circuit protection.

Technical Data

	HDU641S	HDU681S
Number of Outputs	4	8
Gain to outputs	±7dB	±7dB
Noise figure	4dB	4dB
FM	88-108 MHz	
DAB	217-230 MHz	
CCTV	470-862 MHz	
UHF	470-862 MHz	
SAT 1	950-2300MHz	
SAT 2	950-2300MHz	
Line power	12 V 45mA with auto shut down	
Remote power	9 V 15mA with auto shut down	
Connectors	Type-f IEC600169-24	
Power requirements	230V AC 50Hz 280 mA Supplied and fitted Mains Plug to BS 1363
