

RTA 3000

Wall mounted convenience.

Powerful room temperature controller for wall mounting exactly where heat is required. With a breaking capacity of 3 000 W, several individual natural stone heaters can be connected to this controller to centrally regulate even larger rooms. This temperature controller is characterised by its precise temperature adjustment and easy operation. The RTA 3000 is equipped with a thermal feedback and ensures a constant room temperature thanks to its narrow switching differential of ± 0.5 K. The room temperature can be variably selected between 5 °C and 30 °C.

The most important features

Wall mounting

Breaking capacity 3 000 W

Temperature range restriction in the rotary selector

Type	
Type	RTA 3000
Part no.	074198
Height	74 mm
Width	74 mm
Depth	23 mm
