

RTU-S

Wall mounted convenience.

This temperature controller is characterised by its precise temperature adjustment and easy operation. The RTU-S is equipped with a thermal feedback and ensures a constant room temperature thanks to its narrow switching differential of ± 0.5 K. The integral 24 hour quartz time switch enables the controller to regulate the room temperature individually, automatically and without any further accessories with utmost precision. The RTU-S is equipped with an additional switch for: constant comfort temperature, constant setback temperature, automatic changeover comfort

The most important features

Wall mounting

Breaking capacity ~ 10 (4) A, 250 V

24 h quartz time switch

Automatic temperature setback, adjustable from approx. 2 K to 10 K

Temperature range restriction in the rotary selector

Type	
Type	RTU-S
Part no.	073493
Height	79 mm
Width	147 mm
Depth	33 mm
