

## The Revolutionary New Cable Dispenser *SR-QR*

- Quikreel is designed on the principle of a spinning top, allowing the user to easily load and draw cable from the reel. This enables the reel to rotate on its own axis, whilst remaining stationary.
- The Quikreel turns into a cable repair tool by simply removing the bottom stop and placing on a cable spooler. This helps you to stop wasting time and money caused by wet or damaged cable drums.
- Quikreel is designed to be used with most popular cable reels.
- Easy to load with cable for fast dispensing.
- Lightweight, sturdy and compact.
- Time saving with trouble free wiring.
- Move with ease from one area to the next without any disassembling.
