

Every now and again a truly brilliant product hits the street and changes everything....

We believe that SuperCam, the tradesman's 'Third Eye' is such a product. It does so much for so many people and does so at a remarkable value.

SuperCam is a camera inspection system designed to work in conjunction with Super Rod's Cable Rod range.

SUPER **CAM** v5

Colour Cam

When colour matters. The SuperCam v5-C transmits colour video images. Integral white LED lighting helps support close up illumination in dark voids. Smart gun-metal finish.

Infra Red Cam

The SuperCam v5-IR camera is sensitive to visual and infrared light and transmits higher contrast black and white video images. Integral IR lighting supports image clarity when operating in the dark. Dull silver anodised finish.

SUPER **CAM** v5 Cameras

All SuperCam v5 cameras:

- Dustproof and waterproof
- Adjustable focusing from 150mm (6") upwards
- Operating range of over 30 metres (+100') in open space
- Rechargeable batteries with continuous run time of over 40 mins
- CE approved
- Operates on 2.4 GHz

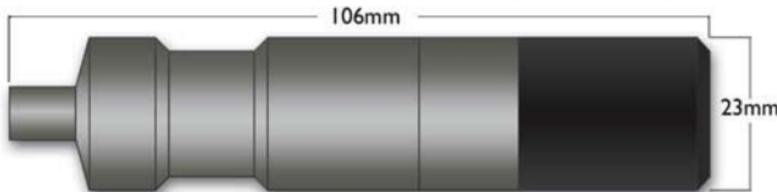

HOW SMALL IS SMALL?

Over the last few years, the personal mobile phone has shrunk in size and gained in functionality. It's not surprising therefore, that many people will look at their tiny onboard cameras and expect to see the same at the end of their rods.

Sadly, this can't be. The mobile phone's camera has the luxury of piggy backing on the mobile's existing technology. Whereas, the SuperCam has to come as an independent, self contained unit, carrying its own rechargeable power supply, lighting, transmission circuitry and aerial. All this, along with focusing and on/off features, are packed efficiently into a tough, waterproof metal and plastic housing. The

SuperCam therefore, is not tiny, but is small, very 'toolie' and tough - a perfect third eye for busy tradesmen.

SUPER CAM v5 Monitors

SC18 Monitor

Standard 4 channel colour/bw 2.4 GHz monitor. 1.8" screen, stylish plastic case and three preset brightness control. Powered by 2 AA batteries.

SC25 Monitor

Classic style monitor with colour 2.5" TFT screen. Full brightness and contrast controls. Powered by 3 AAA alkaline batteries.

SC35 Monitor

Deluxe, bespoke designed, monitor with enormous 3.5" TFT colour screen. Still and video images can be date stamped and captured to SD card for easy recording, emailing or texting to clients or Head Office. Durable shock resistant casing.
