

## KABLEMATE CABLE DISPENSER

The Kablemate Maxum is the latest in the Super Rod range of labour saving products. Designed by busy installers, the Maxum is portable and can take up to 10 drums of cable. It has proved over and over again to save hours of frustration and fewer accidents by ensuring no trailing cable, easy spooling and no snagging.

## PERFECT PARTNERS

**S**uper Rod and the Kablemate Maxum work perfectly together, the rods and attachments allow you to route the cable whilst being backed up by the Maxum's sturdiness, stability and low friction cable disbursement.

## PACK AND PICK UP

Supplied free with all Maxums is a handy 5 metre special Black Mamba fish tape.

When not in use, the Maxum packs away into its own sturdy carry bag.

## KABLEMATE IN USE

Couple with this, the obvious Health and Safety advantages (how many times have you fallen over reels of cable?).

The synergy between these two products just makes perfect sense.

Imagine the scenario – you need to install cable and lots of it – you have a small enclosed space to work in and some difficult to access areas in which to route.

This is the natural domain for Cable Rod and Kablemate.
