

What Varilight dimmer do I need?

*V-Dim is best suited for Incandescent GLS filament lamps on 1 or 2 Way circuits. It is **NOT** suitable for LED loads. It is available as a 1-4 gang dimmer, in all finishes. As a replacement module, or in grid format. See page number:*

V-Plus dimmers are leading-edge and best suited for halogen lamps (including eco-halogen and low-voltage dichroic) and all types of electronic and wire wound low voltage transformers. See page number:

V-Com is suitable for 1-10 LED lamps (Max load 100w) per gang. Available as a 1-4 gang dimmer in all finishes, as a replacement module, or in grid format. See page number:

High Power V-Pro is suitable if you have a LED load that is more than 10 lamps or 100w. They are suitable for up to 30 LED lamps (Max load 300w) per gang. They are available as a 1-3 gang dimmer and a replacement dimmer module. See page number:
