

KÄUDEN™

High Specification plug-in **BROADBAND FACEPLATE**

- Optimize your connection by having the Broadband and filtered telephone sockets together on the same Master wall jack.
- For both standard and superfast services.

...ideal for Internet TV...

Remove two screws and unplug front panel of Telecom Master Socket. Plug the adaptor Faceplate in and replace front panel.

BROADBAND EXTENSION ONLY

Connect to the 'A' & 'B' terminals provided using an IDC tool. For best results use CAT5e or CAT6 specification cable.

NOTE: Telephones will not work on Broadband extensions.

Always consult qualified personnel if in doubt.

**An IDC tool will be required.
(This is not included.)**

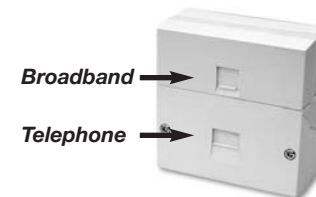

...easy to fit ...

KÄUDEN™

High Specification plug-in **BROADBAND FACEPLATE**

Your router or modem can now be plugged directly into the Master socket when used with this filtered faceplate, offering a better connection as it is no longer reliant on dongles, adaptors or extension wiring, often the cause of poor performance and glitches.

- Just remove the front panel of the Master socket and slot in the faceplate, then simply put the panel back and plug your Modem and Telephone in.
- No need to tamper with existing telephone extension wiring.
- ADSL & VDSL compliant and compatible with all current services that require a NTE5 Master telephone socket.

**...No hassle,
No fuss ...
No problem!**
