

# Domestic Electrician and Contractor TS4U-40

This package comprises of the domestic electrical installer qualifications, plus the courses required to progress and enable you to provide a full contractor service to both domestic and commercial sectors. Services like Pat Testing for companies, hotels, offices. Periodic Inspection and testing certificates for business premises and industrial units as well as Fire alarms, burglar alarms and data cabling.

## Course Content

This course package includes 13 separate courses:

### 5 Day Domestic Installation Workshop: TS4U-MOD1

This 5 Day Practical Installation Electrical Course will enable you to install everything from the consumer unit to the socket and everything in between, for those with little or no electrical experience. Our most popular course!

### 5 Day Principles of Electro Technology: TS4U-MOD2

This science workshop gives you the foundation knowledge to fully understand how and why an electrical systems works, which is essential when considering progression onto City and Guilds 2391 Inspection and Testing and other contractor short courses.

### 4 Day City & Guilds 2392-10 Inspection and Testing: TS4U-92

This entry level course is a mix of practical and theory aimed at practicing electrical installers who have not carried out inspection and testing. It is also suitable for those with limited experience of inspection and testing of electrical installations, such as those domestic installers new to the industry, or those working in allied trades. ie, Plumbers, kitchen fitters, landscape gardeners.

### 5 Day Part P Domestic Installers VRQ Qualification: TS4U-PP

This is the certificate that indicates your competency. When you decide to register as a Domestic Electrical Installer and start to self-certify your installations, this Certificate will be the proof of your competency.

### 3-day City & Guilds 2382-10 (17th edition) TS4U-82

Every practicing electrician must have their wiring regs certificate (17th Edition). This short course is classroom based, with an online test and qualifies you to obtain your 17th Edition wiring regs.

### City & Guilds 2377-12 & 2377-11 PAT Testing Course: TS4U-772

These qualifications enable you to manage PAT testing and undertake PAT testing. Our workshops include both a theory and practical elements; we cover everything necessary to successfully achieve your qualifications and give you skills to undertake PAT testing tasks.

## Duration

13 courses in 40 days. If you are unable to commit to 40 days training in one continuous session, you may attend the 13 courses separately. All 13 courses must be booked together to qualify for the discounted rate.

## Prerequisite

No previous experience required to attend this course.

## Bookings

- Call 01293 554685
- Visit [www.tlc-direct.co.uk](http://www.tlc-direct.co.uk)
- Courses start every week

## Payments

You can reserve your place with a deposit of only £950. The balance can be paid over your period of training - making it easier than ever to get the training you need.

**"Great centre, great location, surpassed expectation."**

Dean Shelly

# TS4U-40 Continued

## Course Content Continued

### City and Guilds 2391-10 Inspection and Testing Course: TS4U-91

Advanced level. This electrical course is theory based and is intended for the personnel in electrical contracting companies who have responsibility for the quality of the design, specification, installation and inspection and testing processes. It addresses, in particular the implications of the wiring regulations for electrical installations.

### 2 Day Emergency Lighting Course: TS4U-EL

A two day course covering the design, installation, commissioning, testing and certification of emergency lighting systems as well as legislative and standards requirements including ongoing operation of the systems.

### 2 Day Fire Alarms Course: TS4U-FA

The course provides the necessary information to design, construct and commission a non-addressable fire alarm system to BS 5839. The course consists of examining and interpreting the relevant parts of BS 5839 then a practical workshop where a system is designed, constructed and inspected and tested. Candidates are then introduced to the practical issues of system maintenance, certification and reporting.

### 3 Day Central Heating Controls Course: TS4U-CHC

A three day short course aimed at anyone involved in the construction, commissioning, inspection & testing or maintenance of central heating electrical control systems. The course covers all the commonly used control systems in use today and is focused on the 'practical' construction and commissioning along with the relevant fault finding techniques.

### 1 Day Burglar Alarm Systems Course: TS4U-BA

This one day course covers the theory and design of domestic burglar alarm systems, allowing you to confidently install the correct equipment and minimise faults and false alarms. Including practical workshop constructing and commissioning & testing a simple domestic burglar alarm system.

### 2 Day Trunking, conduit and Wiring Systems Course TS4U-TC

This entirely practical course combines the Metal Conduit Course together with PVC Conduit, Plastic Trunking skills training and pre-wired busbar trunking systems, importantly it also includes skills training of the wiring systems and techniques associated with single core wiring methods.

### 1 Day Data Cabling Course: TS4U-DC

Our data cabling course covers, Termination, crimping, Cat 5 and 6 differences, relevancy, patch panels, backbone setup, RJ45 connectors and sockets, data cabinets, how systems work, Telephone systems, networking systems and relevant Regulations all done in a mix of classroom and workshop.
