

Protection Perfection

Ultimate Protection

ShieldGLAND

Introducing the ShieldGLAND, an IP68 plastic/brass hybrid cable gland suitable for armoured and SY cables.

Available in M20S, M20L, M25 and M32 sizes.

Superior protection, easy to use and works seamlessly with our COMBI junction box series.

Gland

Suitable for
Armoured

No Shroud
Required

Suitable
for SY/CY

M20S, M20L,
M25 & M32

Flexible Design to Suit Your Needs.

Thanks to its flexible design the ShieldGLAND can be used with armoured, SY, CY and non-armoured cables.

The ShieldGLAND's versatile clamping olive can simply be switched to take either armoured or SY, CY making installation quick and easy.

The Insert

The ShieldGLAND's **unique adaptable insert** allows a wider range of cable acceptance due to its two part sealing gasket. Simply leave as is or remove inner sealing insert depending on your cable requirement.

Why is the ShieldGLAND better?

The ShieldGLAND replaces the use of the conventional BW/CW gland for cable termination.

Firstly the ShieldGLAND offers superior protection, IP68 to be exact which ensures protection against dust, dirt and water.

Furthermore the ShieldGLAND's plastic outerbody eliminates the need for a shroud helping to save time and improve ease of installation.

Finally the finished look creates a much cleaner final installation. The ShieldGLAND has also been designed to work with our iconic COMBI junction box series and accessories.

ShieldGLAND Range
