DVR-EZPRO

Compact 4 channel DVR with integral 160GB hard drive

The all new DVR-EZPRO has significant pedigree as all users of DVR-EZ will tell you however the PRO has certainly earned its heightened status. Although users of the DVR-EZ will find familiarity with the PRO it's performance and features will be a pleasant surprise.

DVR-EZPRO and the networkable DVR-EZPRON have been developed on a brand new platform to provide installers with a robust 4 channel solution at market competitive pricing. Popular features from the previous model such as built in power supply for cameras, now an enviable 500ma per channel, have been retained however many new requested features have been added.

Recordings can now be backed up directly to a USB stick (sometimes known as a flash drive). Images can be viewed sequentially or picture in picture as well as quad and the standard high quality Seagate SV35 drive can be easily replaced or upgraded if required.

Overall the unit has a much simpler end user interface, more like a VCR than a PC and now at last most of the functions can be operated via a remote control.

SPECIFICATION

Product code	DVR-EZPRO / DVR-EZPRON
Description	4 channel stand alone DVR
Hard drive	Removeable 160GB Seagate SV35
Max HDD supported	750GB in single bay
