Music rhythm

The light protects your every minute

- Wake you up in the morning, iluminate you at night
- Strong light illumination helps improve work efficiency
- The color of light affects the body's feelings of warmth and coldness
- Blue makes people feel cool, yellow makes people feel warm

night
A good sleep
Low brightness, low light
Sleep uninterrupted

In the morning
The best part of a day is in the morning
Cold light colors are protected from attack
Energize your body

day
Need to rest and adjust
Cold light changes to warm light
Reduce brightness

In the evening
relax
Warm light
Melatonin begins to secrete

MLT   cortisol

9:41 AM   100%
