

ESF1 & 4

Wireless Keyfob

- Robust design
- 1 and 4 button models available
- 100m transmission range to receiver
- 2 year battery life

Available as a single or quad-button variant, the keyfob works in conjunction with EasySwitch PIR detectors and wall switch transmitters and can operate all receivers in the range. The LEARN process from the fob to receivers is quick and easy to set up. The fob is supplied with a Velcro square to adhere to a wall for quick access or you can attach a lanyard to the unit.
